

The 14th CHPC Coding Summer School

The 6th NITheCS Summer School on the Foundations of Theoretical and Computational Science

29 January - 9 February 2024 | 10h00 – 16h00 (Mon – Fri)

Attend at a designated university / research location in Southern Africa

Learn the fundamentals of programming, data science, HPC, and computational sciences

FREE registration for all successful applicants

WHAT TO EXPECT:

- Daily lectures, interactive tutorials, notes, quizzes and assignments.
- STEM talks, presented by experts in their fields, will showcase the varied applications of the coding skills being taught.
- Certificates will be awarded to qualifying students.

WHO SHOULD APPLY?

- All talented students registered for a postgraduate degree. Students from previously disadvantaged backgrounds are highly encouraged to apply.
- Researchers in industry.

A background of programming skills and basic Linux will be an advantage.
